

By Orlean Koehle, ©June 2, 2022

Overview –

- The many evidences of an approaching food shortage:
- Water shortage is it natural or manufactured?
- Who and What is behind this engineered food crisis?
- Why? What do they hope to gain their ultimate goals?
- What tactics are they using?
- What can we do to prepare ourselves?
- Sources for ordering dehydrated food, books, and more information.

Evidence of Approaching Food Shortages

3

- **Mysterious Fires** in almost 40 food packing 1. plants in one year. (Picture of the Purdue Farms fire, NC. 4/30/2022)
- 2. **Transportation Crisis** - hold ups in shipping, trucking and rail – over 100,000 containers not being delivered from LA and Long Beach ports. (Picture is from the LA port)
- 3. Monopoly of 50% of Seeds: The seeds owned by Monsanto are changed to harmful GMO (Genetically Modified Organisms).
- Food Shortages already of certain food 4. items like baby formula (but plenty is at the border for families crossing into the US illegally, as this picture shows).
- 5. **Poultry Shortage -** 36 million chickens and turkeys slaughtered because of "bird flu."
- War in Ukraine affecting 1/5 of world wheat. 6.

4

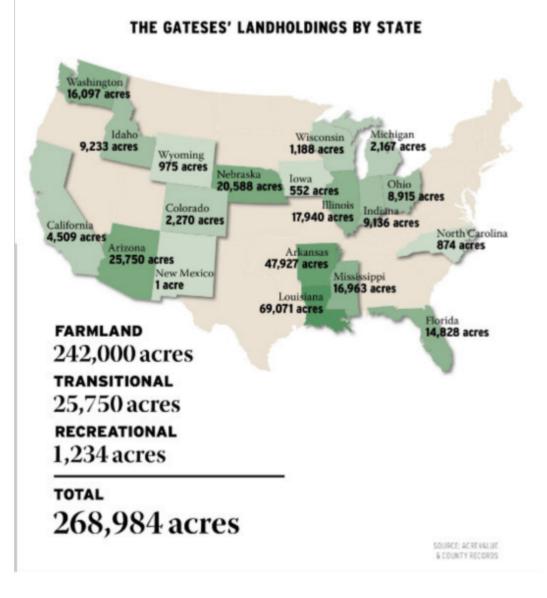

7) Farmland Take Over

 Large quantities of farmland and ranches are now owned by only a few wealthy monopolies. (Jeff Bezos owns 420,000 acres; Bill Gates owns 268,984 acres)

More Evidence of Approaching Food Shortages

8. Sky high fertilizer costs and fertilizer scarcity. (Many fires in fertilizer plants, one train derailment.)

9. Insanely elevated diesel fuel costs for trucks for shipping and for tractors and other farm equipment (in CA over \$7.00 a gallon).

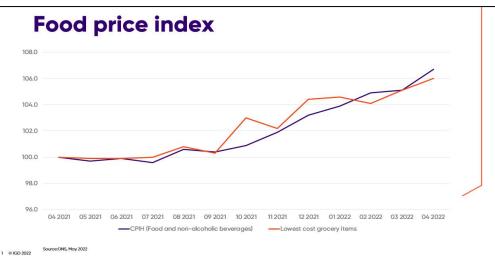

10. More farmers are not planting crops because they cannot afford the increased costs and would make little profit.

11. Costs of food skyrocketing. Inflation in 2022 hits highest levels in 40 years. Cost of food increases 12% each month and up 30% from last year (March of 2022). Price of flour increased 14%; cooking oil up 50%.

12. Possible threat of US involvement in war – from an attack by Red China or Russia or both combined.

https://www.weforum.org/agenda/2022/05/increasing-food-prices-expertexplains/; and https://www.brighteon.com/ff081a04-66f4-41b6-8001e92ce9a0fb4a

Fires Regarding Food and Wreck of Fertilizer Train (2022)

- May 29, a fire at Forsmans Farms, a poultry plant in Howard Lake, Minnesota, killed 200,000 chickens.
- May 23, massive train derailment in Alberta, Canada, of train carrying mainly potash for fertilizer.

- April 30, fire broke out at the Perdue Farms Food Processing Plant – Chesapeake, N. Carolina.
- April 22, a small plane crashed into a General Mills food facility in Covington, Georgia, damaging 6 tractor trailers; two dead, charred bodies found in the plane.

- April 19, in Dafur, Oregon, headquarters of Azure Standard, the nation's leading organic food distributor, was destroyed by fire.
- April 14, a small plane crashed onto a potato food processing plant roof in Heyburn, Idaho; pilot died; Fortunately, no fire started; 18,000 acres of potatoes are processed in the plant.
- April 13, the Taylor Farms, 225,000 foot facility for processing fruits and vegetables and packaged salads in Salinas, CA, was burned to the ground.
- April 12, a fire broke out at New Hampshire's East Conway Beef and Pork slaughterhouse.

20 Mysterious Fires in Two Months, March & Feb. 2022

No One Knows How They Started?

- March 31, the Rio Fresh Onion Packing Plant was partially destroyed by fire in San Juan, Texas.
- March 28, A Maricopa AZ, Food Bank was destroyed including 50,000 lbs. of meat and canned goods.
- March 24, a fire destroyed the Pentocost McCrum potato processing plant in **Belfast, Maine.**
- March 23, during the night, a fire broke out on the roof of the General Mills Food Processing Plant, Cedar Rapids, Iowa.
- March 16, 2022 largest fire and longest lasting at a giant <u>Walmart</u> distribution center in Plainfield, Indiana. It is 1.2 million square feet (about the size of 20 football fields). One thousand employees were evacuated; 200 firemen came to assist in putting it out, which took several days. Massive amounts of food, fresh produce, clothing, electronics, etc. and delivery trucks were totally destroyed.
- March 16, extensive damage from fire to a new production line dedicated to Hot Pockets at a Nestle plant in Jonesboro, Arkansas.

 March 14, Wayne Hoover Dairy Farm caught fire during the night at Longwood Township, MO; 40 cows were rescued by neighbors. (cont. on next slide)

Fire at Walmart Distribution Center, Plainfield, IN

20 Mysterious Fires Cont., Plus a Chemical Leak - 2022

- March 23, during the night, a fire broke out on the roof of the General Mills Food Processing Plant, Cedar Rapids, Iowa.
- March 16, extensive damage to a new production line dedicated to Hot Pockets at a Nestle plant in Jonesboro, Arkansas.
- Feb. 28, Nutrient Ag Solutions, a dry and liquid fertilizer facility, caught fire in Sunnyside, WA.
- Feb. 28, fire broke out in the Shadow Brook Farms and Dutch Girl Creamery in Lincoln, NE. The building was a total loss with \$200,000 in damages.
- Feb. 22, fire destroyed the Shearer's Food Processing Plant in Hermiston, OR, that makes potato and corn chips. The boiler exploded and several people were injured.
- Feb. 22, the Deli Star Meat Plant in Fayetteville, Illinois, was totally destroyed by a fire in the night; six workers escaped unharmed; 130 people now without a job. The plant processed beef, pork and poultry.
- Feb. 21, Lincoln Premiere Poultry, part of Costco, at Fremont, NE, had an ammonia chemical leak that sent three people to the hospital.

20 Mysterious Fires Cont., also in Fertilizer Plant - 2022

- Feb. 18, Bess View Dairy Farm St. Albans, VT; a fire started in the night, destroyed the barn; 800 cows were spared, taken care of by other farmers.
- Feb. 22, a propane boiler explosion destroyed the Shearer's Foods potato chip plant in NE, Oregon.
- Feb. 16, a fire broke out at Louis Dreyfus Company (LDC), Claypool, IN, the largest soybean and biodiesel processing plant in the United States.
- Feb. 15, Bonanza Meat Company, El Paso, TX, was totally destroyed by fire.
- Feb. 3, Wisconsin River Meat Plant at Mauston, WI, partly destroyed by fire. The livestock were rescued.
- Feb. 3, Percy Dairy Farm, Stowe, VT; a huge fire started at night, it took nine fire departments over six hours to fully knock the fire down. Over 100 cows were killed in the blaze.

- Jan. 31, Fertilizer Plant, Winston Salem, NC; 6,500 people were under evacuation orders for 3 days after a fire broke out, which officials said risked becoming one of the biggest explosions ever to occur in the US.
- Jan. 13, Cargill-Nutrena Feed Mill, Lecompte, LA; the fire burned for over 12 hours. An explosion occurred as firefighters were working the fire. The 140,000 ton mill manufactures feed for pet food, aquaculture, equine, beef, poultry, dairy, and wild game industries.
- Jan. 6, a fire did damage to a poultry processing plant in Hamilton Mountain, Ontario, Canada.
- <u>https://www.israel365news.com/268985/25-mysterious-fires-at-food-processing-plants-across-us-end-of-days-food-shortage/</u>
- <u>https://winepressnews.com/2022/06/01/food-processing-plants-and-distribution-centers-are-burning-down-creating-even-more-supply-chain-problems/</u>
- <u>https://www.foodstoragemoms.com/food-processing-plants-burned/</u>
- <u>https://ussanews.com/2022/06/02/these-are-the-food-processing-plants-that-mysteriously-burned-down-in-2/</u>

Thirteen Fires in the Year 2021

- Dec. 12, a fire broke out at West Side food processing plant, San Antonio, TX; it suffered over \$150,000 in damages to food supplies. A cooler had caught on fire.
- Nov. 30, a flash fire started at the Fieldale Farms Corporation, a poultry farm headquartered in Baldwin, Georgia. It started in a silo and quickly spread.
- Nov. 29, a fire partially destroyed the Maid-Rite Steak meat processing plant in Scott Township, Lackawanna County, Pennsylvania.
- Nov. 15, Garrard County Food Pantry in Lancaster, KY was totally destroyed by fire; result of arson by a 60-year old woman who admitted to starting the fire with her cigarette in a pile of papers.
- Oct. 21, Darigold Plant for making dairy products in Caldwell, Idaho, was partially destroyed by fire. All employees were safe.
- Sept. 12, 2021, a fire broke out at the JVS USA beef processing plant in Grand Island, Nebraska.

- Aug, 23, 2021, a fire broke out at Patak Meat Products in Cobb County, Georgia, resulting in severe damages.
- Aug. 28 A second fire broke out at the same Birmingham, Alabama pet food plant as next cited.
- July 30, in Birmingham, Alabama, a fire partially destroyed the Tyson's River Valley plant in Hanceville, Alabama. It used chicken parts to make animal and pet food.
- July 25, a fire damaged a Kellogg plant in Memphis, Tennessee; 150 firemen worked to put it out.
- April 30, a fire broke out at the Smithfield pork processing plant in Monmouth, Illinois. n March 2021,
- Feb.15, an explosion in Postville, Iowa, at the Agri-Star Meat Packing Plant injured two workers. Fortunately, no fire was started.
- Jan. 11, a fire destroyed the Deli Star meat processing plant in Fayetteville, Illinois,

Wheat Shortages Due to War in Ukraine & Russia

- In Feb. 24, 2022 Russian troops invaded Ukraine; many farms have been destroyed by explosions and fires; many farmers have fled creating a major disruption in the global wheat supply, since together Ukraine and Russia produce 1/5 of the world's wheat.
- Countries that depend on wheat from Ukraine and Russia are: Egypt – 82%; Benin and Somalia – 100%; Laos – 94%; Sudan – 75%; Congo – 69%; Senagal- 66%; Tanzania – 64%

Port terminal showing many wheat storage silos in Ukraine

Possible Approaching War with China and Russia?

- Dr. Leaman Yang, Jeff Nyquist, and Maria Zeee tell of possible invasion of USA before November election, 2022
- "The best Russian troops are hidden in Asia getting ready for an invasion of the USA. The war with Ukraine is just a diversion for Russia."
- China has thousands of ships ready for battle, far more than if they were just planning an invasion of Taiwan.
- https://www.brighteon.com/ff081a04-66f4-41b6-8001-e92ce9a0fb4a

"World-wide Drought" – Are We Really "Running out of Water?" "40% of West is in Exceptional Drought"

Lake Mead, on the Colorado River, the largest reservoir in the U.S. – is "now at its lowest since 1932 when the Hoover Dam was finished."

Lake Powell in Utah – 2nd Largest Reservoir in the U.S. – "approaching critically low levels."

Is this a Government Made Drought? How is a Water Crisis Beneficial to Tyrannical Governments?

• What happens when people have no water? Can fires be put out? Can dust bowls be

created?

Large Migration to the Cities: When people have lost their homes to fires and are underinsured, so they can't rebuild, or their wells have gone dry, they will be forced to sell cheaply and move to more affordable housing in the city - to "stack and pack housing," where they will have enough "water," but no room for cars or gardens. They can, thus, be more easily controlled. The picture is from Rancho Cucamonga, CA. Single family homes are right across the street. What does this do to property value for those homes?

How Can Government Make Drought? By Altering the Weather

Chemtrails for Weather Modification

Spraying (or seeding) of the skies has been going on since the 1940s to try to make rain. So chemtrials are not new.

Patents were taken out for the spraying of the skies in the 1970s and NOAA authorized it (shown on the next slide).

The pictures above show some of the patterns for chemtrail spraying. The planes spray nano particles of aluminum oxide, barium, strontium, and even thermite (all highly explosive in fires). The chemicals spread out and slowly drop to the earth.

The picture on the right show the kind of planes that do the spraying - either leaving four trails or two trails.

The Kinds of Planes that do the Spraying

Scientific Observation Reveals Jets Are Spraying Aerosols - Not Contrails Circles in frames A, B and D show aerosol emissions that cannot possibly meet the USAF of NASA definition of "contrails" due to the absence of a transparent vapor gap between the 1,800 Deg F. exhaust and visible ice crystal formations.

2 The arrows in frame B and C point to anomalous aerosol emissions unrelated to normal water vapor contrail formation. These aerosols appear to be released from the fuselage of the aircraft.

Weather Modification as Authorized by NOAA

Code of Fed. Regulations – part 908 and 908.1 and 098.2 Maintaining records and submitting reports on weather modification

- "The following, when conducted as weather modification activities, shall be subject to reporting:
- (1) Seeding or dispersing of any substance into clouds or fog, to alter drop size distribution, produce ice crystals or coagulation of droplets, alter the development of hail or lightning, or influence in any way the natural development cycle of clouds or their environment;
- (2) Using fires or heat sources to influence convective circulation or to evaporate fog;
- (3) Modifying the solar radiation exchange of the earth or clouds, through the release of gases, dusts, liquids, or aerosols into the atmosphere;"

Who does the reporting? "Any person engaged or intending to engage in any weather modification activity."

- "(4) Modifying the characteristics of land or water surfaces by dusting or treating with powders, liquid sprays, dyes, or other materials;
- (5) Releasing electrically charged or radioactive particles, or ions, into the atmosphere;
- (6) Applying shock waves, sonic energy sources, or other explosive or acoustic sources to the atmosphere;
- (7) Using aircraft propeller downwash, jet wash, or other sources of **artificial wind** generation; or
- (8) Using lasers or other sources of electromagnetic radiation."

HAARP and Chemtrails – How Weather is Manipulated

- HAARP (High Frequency Active Arora Research Program) is a series of high frequency radio transmitter towers built in Gakona, Alaska. It is listed as a military defense project. It is an electromagnetic weapon that has the capability of heating the upper atmosphere, called "the ionosphere."
- When chemtrails are present, HAARP can heat the tiny metallic aerosol particles to more than 100%. Since heat rises, this causes the clouds that were forming to move somewhere else. This is altering pressure systems and jet streams.

 This prevents the accumulation of water vapor that would otherwise form and produce rain fall. HAARP can then lift and move those tiny metal particles somewhere else and cause enormous rain storms, hail, hurricanes, tsunamis, etc. in unexpected areas.

(Orlean Koehle, California's Water Crisis – Agenda 21 - Do you Smell a Fish? PP. 280-290)

Nano "Smart" Thermite Plus Graphene Oxide (GO) Sprayed and <u>Ignited</u> by Microwave Radiation (like 5G)

- "This effort demonstrates the development of a novel, graphene oxide nanoscale thermite composite with thermally tunable microwave ignitability."
- Electromagnetic nanoscale thermite and aluminum oxide were tested with a thin nanoscalen coating of reduced graphene oxide (rgo). This composite was later successfully ignited by microwave radiation (such as 5G laser or 5G antennas)
- Is that why many trees, homes and cars were literally exploding in recent fires in California? Were they all first sprayed with nanoscale smart thermite and GO and ignited by 5G?
- <u>https://news.engineering.iastate.edu/2021/09/01/smart-</u> <u>electromagnetic-thermite-research-on-cover-of-asc-applied-</u> <u>materials-and-interfaces/</u> Sept. 21, 2021

 Is this what happened in the Santa Rosa fires of 2017 and the Paradise fires of 2018? The fire was so hot it melted metal, porcelain, glass and rubber on the car tires; aluminum was running off the cars. (Steal melts at 2,500 °F.)

"The Future of Food on Planet Earth"

An artist's rendition of vertical farming in big warehouses with robots managing the production. This is already happening. (Thanks to G. Edward Griffin, "Need to Know" podcast, May 13, 2022)

- Future GMO Crops: "Five key crops, lettuce, tomatoes, strawberries, cilantro, and blueberries, are targeted for manipulation. GMOs already account for 75-80% of food Americans consume.
- BASF, Corteva (formerly Dupont), Syngenta (part of ChemChina), and Monsanto (now Bayer) control roughly 50% of the global seed market."
- <u>https://needtoknow.news/2022/05/new-</u> <u>controlled-food-system-is-now-in-place-and-they-</u> <u>will-stop-at-nothing-to-increase-control/</u>

Vaccinated Tomatoes – The Latest GMO Plans

- Dr. Lee Merritt said in an interview, June 1, 2022, that in Mexico, Daniel Garza, a bioengineer, is using a 200acre plot for growing genetically engineered tomatoes with the COVID spike protein in them.
- That way children can get the vaccine and not have to be stuck with a needle. He believes they can make all the vaccines necessary for all the diseases of the world right there on his 200 acres.
- <u>https://www.brighteon.com/1d795776</u>
 <u>-15bd-4fd8-9841-52c5ba776fc9</u>

What is Behind the Approaching Food Shortages?

<u>Control, Power, Money</u>: "Who controls the food, controls the people. Who controls energy can control whole continents. Who controls the money controls the world." Spoken by Henry Kissinger – 1970, who was the National Security Advisor for President Richard Nixon

Who are the powerful people who are seeking to control the food, the energy, the money and all aspects of our lives?

The food industry is monopolized by 10 companies, the majority of which include **Vanguard and BlackRock** as top shareholders.

The Seed Industry consists of: BASF, Corteva (formerly Dupont), Syngenta (part of ChemChina), and Monsanto (now Bayer). They control roughly <u>50% of the market</u>. (www.coreysdigs.com/global/new-controlled-food-system-is-now-in-place-and-they-will-stop-at-nothing-to-accelerate-their-control/

<u>Who?</u> <u>Heads of State</u> like Joe Biden – "Who Can Increase & Disseminate More Rapidly...Food Shortages."

• "We had a long discussion in the G7 with the, with both the **United States,** which has a significant the third-largest producer of wheat in the world — as well as *Canada*, which is also a major, major producer, and we both talked about how we could increase and disseminate more rapidly food, food shortages." Joe Biden - NATO Headquarters, Brussels, 3/24/2022.

"Yes, we did talk about food shortages, and it's going to be real."

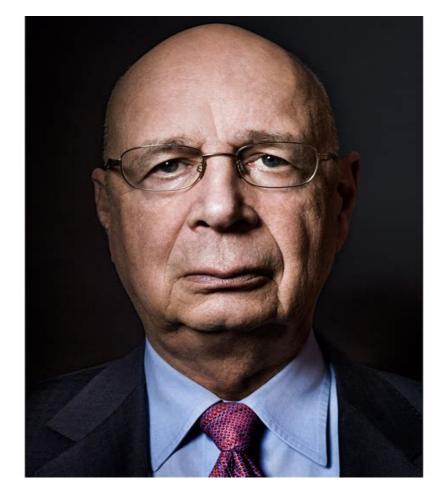

How and Why is this Happening?

• How? through a monopoly – a small number of powerful elitist people who, (as if with long tentacles), are seeking to control every aspect of our lives: force us to wear masks, give us the jabs, keep data on us, and keep track of us with vaccine passports, and control all aspects of food:

- The elitists seek to control farm and ranch ownership, seeds, food processing plants, get rid of actual meat, beef, chicken, pork, and let us have GMO food.
- They also want to **control of the water through controlling the weather** so they can control whether or not we have water.
- Why? It is all about control. If you control the food and water, you control the people.
- It is all about power, money, and their ideology and theology – they believe in population reduction, eugenics, AI, and transhumanism – they want to live forever, but only certain people, the elite should live forever. They do not believe in God but want to take his place, as "creators." Many worship Satan, who they believe is the true god of this earth.

The Elite's Ideology - The Great Reset-

- The Great Reset is a return to Marxist principles, under the direction of Klaus Schwab, a German Communist, who is claiming that "Capitalism has empirically failed."
- The first plank of the Communist Manifesto, written by Karl Marks is: **Abolition of Private Property**." Their goal is that by 2030, "we will all own nothing and be happy."
- There is a connection between COVID 19, Black Lives Matters, UN Agenda 21 and Agenda 2030, Sustainable Development, Climate Change, Transhumanism, CRT being taught in our public schools and universities, increased biased and corrupt media, WEF, UN, Klaus Schwab, Bill Gates, and George Soros.
- Their ideology includes these goals: to distract us, discourage us, overwhelm us, divide us, and fill us with such fear, that we will gladly trust the government to know and do what is best for us.

Klaus Schwab

What Tactics are The Communists Using?

- They are striving to push four things on the world:
- 1) A Tyrannical, Communist form of government and its economic system;
- 2) Unlimited Power (for the elite)
- 3) The worship of Satan, who the elite believe is the God of this earth. That will come through promoting the Anti-Christ, the Mark of the Beast, transhumanism, the worship of idols, and
- 4) A New One-world Religion: the Bible, Christianity and Judaism will not be tolerated. Christians and Jews will be persecuted, imprisoned, or killed.

5) Forcing "Stakeholder Capitalism" On the World

"Stakeholder Capitalism" is an ideological subversion that results in centralization and collectivization of all capital. Firms become only accountable to their stakeholders, not their shareholders. It is all about the collective. The individual is no longer important.

Yuri Bezmanov

Taken from a 1984 interview with **Yuri Bezmanov, a** defector from Russia, former KGB, (with author G. Edward Griffin)

Four Steps of Marxist Subversion of a Nation:

- 1) Demoralization destroy morals, teach youth to hate America, to hate their own history, to no longer value their Judeo-Christian religious foundation and principles.
- 2) Destabilization capitalization is "reset," changed; a new social contract made – called "socialism." All this was made so much easier because of COVID.
- 3) Crisis use continual fear tactics to get a nation to give in to the new reset, more restrictions, and more taking of liberties.
- 4) Normalization It is not the old normal, it is now the new normal, "the Great Reset," pure communism.

What Can we Do? Be Prepared to be Self Sustaining

My Personal Experiences and Lessons I Learned about Preparedness:

- Earthquake in Yellowstone Park in 1959, when I was 15 I learned the importance of a car grab bag with enough food in it for all passengers. All the stores were closed after the earthquake.
- Giant flood when the Teton Dam burst in Idaho, on June 5, 1976, leaving enormous devastation. Fortunately, all towns were evacuated beforehand along the Snake River, the path of the flood. My parents and sister, who were living on our farm, 5 miles from the town of Roberts, took in 4 other families for 3 weeks (2 families to each home). We learned the importance of long term food storage to share with others and the importance of church and community working together to help others survive and to rebuild.

The Teton dam broke and a mega ton bomb of water came rushing down wiping away 3 small towns and anything else in its path. Fortunately, there was enough warning for people to evacuate beforehand, and only 11 people were killed.

Other Lessons Learned About Preparedness

- Financial Stress in 1979, my husband lost his job in Fortuna, CA. We relied on our savings and on food storage for much of that time (about 9 months).
- House fire in 1984 in Santa Rosa, I learned the importance of being prepared with a fire extinguisher (which I did not have); The only thing I did right was get 5 children out of the home. I learned first hand of the kindness and support from church and community.
- Santa Rosa Fires of 2017 We all had to evacuate. Again I learned the importance of being prepared with a grab bag of food, water, medicine, and provisions, pet food, and a bag of important documents to grab: marriage certificate, birth certificates, your will, passports, important contact numbers, and pictures that would be destroyed by fire.

Be Prepared: Mentally Spiritually, and Physically

- Be Mentally Prepared keep researching, attending meetings with like-minded people, search for and recognize the truth. As the Prophet Hosea said, "My people are destroyed for lack of knowledge." Hosea 4:6
- **Be Spiritually Prepared** have the ability to adapt to challenges with courage, faith, and hope in God.
- Keep God's commandments and have a strong working testimony of Him. Be able to get answers to prayer when emergencies arise.
- **Be Physically Prepared** If you are prepared, there's no need to fear or to panic.
- **Be Ready for an Evacuation** because of an earthquake, fire, tornado, hurricane, or flood.
- Have a 72-hour emergency kit for each family member that you update regularly, with food, snacks and 5 liters of water

per person for three days. Include a battery or windup radio. Have a collection of small \$bills. ATMS may not function. Have a separate backpack of copies of essential papers and documents, will, passports, insurance papers.

- Have easy to grab camping supplies like tents, tarps, sleeping bags, extra blankets, hiking boots, ponchos, warm changes of clothes, enough for the family.
- Have an emergency evacuation plan that all members are aware of: where to go, what is expected of each person, contact info for each person,
- Emergency car kit. Some people store in their car at all times a backpack that includes: a first aid kit, essential repair tools, flashlight, a warm jacket, a blanket, boots, a good pair of walking shoes, and a cellular phone charger. If you can afford it, have a satellite phone that can communicate from anywhere.

Long-Term Temporal Preparedness:

- **Get out of debt;** if possible, pay off your mortgage. "The borrower is the servant to the lender." Prov. 22:7
- Have a year supply of food for your family and some source of water (your own well or a tank for storing water) and filters to filter the water.
- Have seeds for a year or more to grow your own food (natural, non-GMO, non- hybrid, heirloom).
- Store critical medicines and vitamins in a cool place. Have enough for a year if possible.
- Have enough savings (cash on hand) to meet your essential needs for 6 months. (If we are still allowed to use cash).
 - Taxes: Property, Income, licenses, etc.
 - House Payments.
 - Utilities bills: Water: Gas, Electric, Garbage, Phone, Internet service, etc.
 - Insurance Payments, auto, house, life etc.
 - Essential services like doctor, dentist, bus fares, gasoline, auto repairs, school fees, etc.

- Have Fuel to provide cooking and heating needs for a year. The rule of thumb is a cord of wood or a ton of coal will provide enough warmth for a month in winter for a household. (If any of that is allowed in your area.)
- Have clothing for your family for a year including the clothing for cold winter. For growing children an option is to have sewing supplies including a sewing machine with cloth and even materials to make shoes, etc.
- Have other essential supplies needed for a year like: soap, cleaning agents, toothpaste, razor blades, first aid kit, diapers, tampons, etc.
- Have an emergency generator and fuel to provide power to your refrigerator, freezer, some lights, etc. There are also solar generators that are very good.
- Have enough tools and equipment for farming, house repair, auto and equipment repair.
- Have a working greenhouse so you can grow your own crops all year round. Consider using vertical gardening.

Vertical Gardening Inside a Greenhouses

If it is really cold during the winter, you can bring your plants inside if they are on some sort of a vertical garden on wheels. This is especially good for growing lettuce, tomatoes, beets, parsley, herbs, that you can use for salads year round. (So you can avoid GMO ones.) THE BEST Rasied Garden Beds on Wheels!

Additional Ideas for Temporal Preparedness

- Have weapons and ammo. Have family members trained in proper use and safety. Keep locked up until needed.
- Have storage containers that are water proof and EMP proof. Put in these containers: computer backups, spare computer; emergency radios: AM, FM, two-way hand radio, ham radio; spare electronic parts for equipment and vehicles.
- Have polyethylene sheets to repair windows and make emergency greenhouses.
- Have a good library that is safely stored for most emergencies. Include books on all types of skills: making and repairing things, gardening, greenhouse construction, first aid techniques, water treatment, weapon training, good health, etc.
- Have a good set of maps and a compass and GPS unit. Have addresses and phone numbers on paper of all family members and other necessary people. Note: An EMP proof container can store a memory stick with a spare computer which can have a very large library on it.

- For bacteria and virus infections have a silver water generator, several pounds of vitamin C, grow your own citrus trees.
- Water treatment equipment: filters, Reverse Osmosis unit, a quality UV light kit designed to kill virus and bacteria in your treated water.
- Have a two-way radio or ham radio for extended member of the family; store in an EMP water proof container with several spare batteries. The radios should be strong enough to contact other members. This will go a long way in protecting the family and giving them peace of mind.
- Get in physical shape and stay in shape.
- Store enough gold and silver coins and other valuables to barter with.
- Have enough long term provisions that you will not be tempted to take the Mark of the Beast (Rev. 13:16-18) – in case you need that mark to be able to "buy and sell." You will need enough provisions to survive without going to the grocery store.

Sources for Ordering Dehydrated Food

Businesses that sell Dehydrated food that just requires water and lasts 25 years:

- <u>https://valleyfoodstorage.com/collections</u> (freeze dried foods)

Conclusion

We know from scriptures that perilous times are coming: (read Mathew 24 and Revelations 13), but we also know that God does not want us to be fearful. In fact, he wants us to "**be of good cheer**" (mentioned 8 times in the Bible), and to "fear not" (mentioned 365 times - once for every day of the year).

Replace fear with faith. Faith is an action word. If you are prepared, you have no need to fear.

Orlean Koehle www.booksfortruth.com
